SMITTY DRIVER

FOR DRIVING ALLEN AND SIMILAR TYPE SCREWS

SAVES TIME AND TEMPER!

No more lost time and temper looking for the "right" sized wrench! The new Smitty combines the most popular, standard size, socket head wrenches into a sturdy knife-like handle small enough to fit in your pocket.

- Right Size Always Handy
 - Husky — Durable Handle Allows Greater Leverage
- Handle Will Not Break or Bend
 - Special Heat Treat Makes Blades Last Longer
- Individual Blades Replaceable

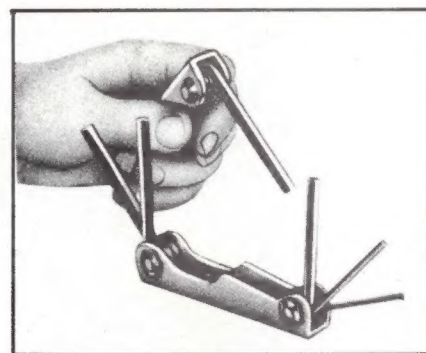

P-6

.050, 1/16", 5/64", 3/32"
1/8", 5/32"... fit set
screws #3 to 5/16" incl.,
cap screws #1 to #12 incl.

Smitty folds knife-like into a single sturdy handle, small enough to fit into a pocket, yet its design permits greater leverage at every angle.

When the ends of the wrenches do become worn, they can be made like new simply by grinding off the worn end. Then when it is no longer possible to grind the individual wrenches, they can be replaced by removing the end bolt and inserting a new wrench of the same size.

P-5

3/32", 1/8", 5/32", 3/16"
7/32"... fit set screws
#10 to 7/16" incl., cap
screws #5 to 5/16" incl.

This display is now a standard in stores all over America—nationally advertised to 1,000,000 readers annually

MAGIC TIP SCREWDRIVERS

Holds Screws Tight When Inserting or Removing

The HUNTER'S holding mechanism is completely internal and fully automatic. Simple to use — just place the blade in the screw slot and apply slight pressure — the HUNTER grips it!

- Shockproof non-combustible plastic handle
- Super hard steel center pin Tough 4155 Chromoly steel tip
- The HUNTER starts the screw The HUNTER drives the screw

One tool starts the screw and drives it! Simply place the tip of the Hunter in the screw slot and push gently... the screw becomes firmly fastened to the blade tip—easy to start even in the most difficult places. No bulky claws to get in the way because all the screwholding mechanism is internal... giving a stronger grip in the screw slot. Hardened steel locking pin, tough chromoly steel tip, plus sturdy, all over construction assures long trouble-free operation. Shockproof, red plastic handle. Non-magnetic. Fully guaranteed. 12 sizes.

GUARANTEE

The Hunter Screw-holding Screwdriver is guaranteed against defective workmanship and materials.

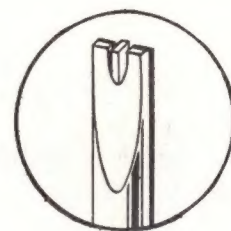

If, because of improper use, breakage of any part should occur, or tool should fail to operate properly, return the screwdriver with 50c to cover handling and postage, and the tool will be put in operating order.

Blade Lengths—approx. A=3/4", B=3 1/4", C=3 3/4", D=7", M=3 1/2", M5=2 3/4", M8=4 3/4", M12=7 1/2".

TUNING SLUG RETRIEVER FOR
STANDARD COIL TUNING UNITS

- FITS DEEP SEATED TUNING UNITS
- FITS NEW WIDE SLOTTED SLUGS

It's Sensational! You Retrieve Lost Tuning
Slugs Without Removing the Chassis

TENITE HANDLE ALLOY BLADE
PRECISION MADE BUILT TO LAST

INSTRUCTIONS FOR PROPER USE TV Slug Retriever

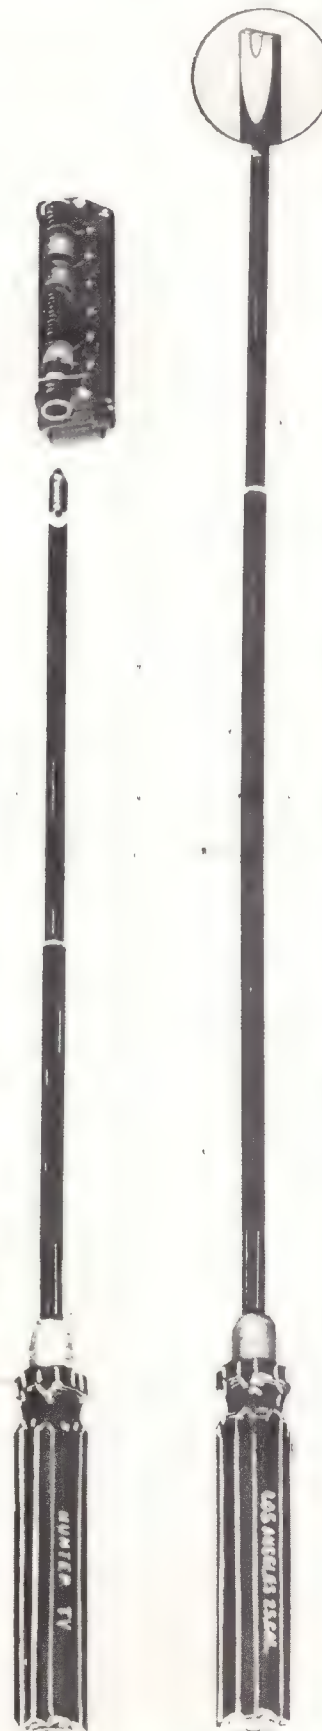

IMPORTANT: Proper use of the TV Slug Retriever assures satisfaction.

- (1) Insert the Hunter TV with the blade parallel to the retaining wire.
- (2) With the blade under the retaining wire turn the blade clock-wise. This raises the wire and allows the driver to pass into the chamber.
- (3) Continue to turn clock-wise until the screwdriver blade falls into the slot of the slug—remember not to apply forward pressure on the handle at this time or you will rotate the center pin and prevent the screwdriver from entering the slot of the slug.
- (4) After the blade has engaged in the slot of the slug apply forward pressure to lock the slug to the driver.
- (5) Now turning counter clock-wise remove the slug slowly as not to damage the coil. It is important to keep turning the slug as you remove it. This method automatically resets the slug under the retaining wire.
- (6) When the slug is back in place release the screwdriver by holding the hex portion of the blade and pushing back on the handle.

CODE	Overall Length	Diameter of Blade	Diameter of Handle	NET PRICE	Weight Per Doz.

TEE CLAMP

★ A Quick Action Drill Press Clamp

Here Is a New Hold Down Clamp
Packed With Features to Save You
TIME, TEMPER AND MONEY

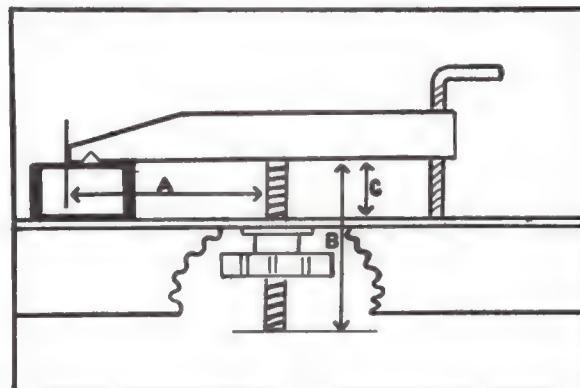

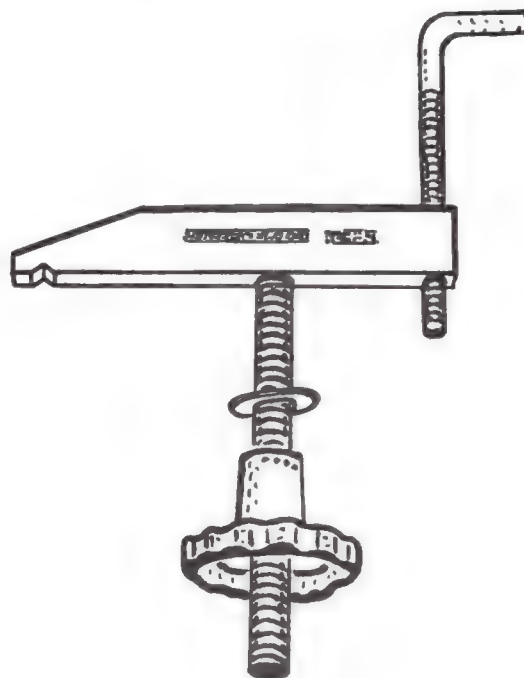

- ★ Faster clamping action.
- ★ Reduces set up cost. ★ Rugged...
- ★ V groove holds down round material.
- ★ Positive Grip Clamp will not loosen and allow material to slip.
- ★ Tapered end allows clamp to operate close to working area.

SIMPLE EASY TO USE

For drill presses with elongated slots in the table, the Tee Clamp is merely slipped up through the slot ready for instant use. For tables, benches, etc. with smaller slot and round holes just remove the knob... insert the adjustment screw through the hole and replace the knob. Clamp is ready for use.

PLASTIC HAMMERS

ONLY MATTICKS by Hunter

Give You ALL These Features

- ★ (1) THE MATT-LOK Head Can't Turn Off
- ★ (2) MACHINED STEEL HEAD Won't Split or Break
- ★ (3) NON-RUSTING HEAD
- ★ (4) REPLACEABLE CELLULOSE TIPS

Matticks Hammers are the safest softest hammers made, statically balanced, tough, soft faces produce better work. More economical, too, because they out-last other soft hammers of wood, rubber, or fabric, and worn tips are easily replaced.

Hammer No.	Head		Handle Length	Head Weight	LIST PRICE		Face Only per Doz.

GREASE INJECTOR

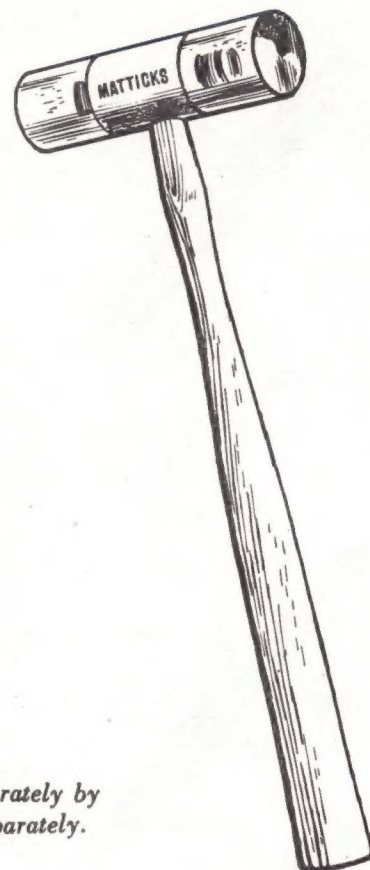

- MAKES PACKING SPRINGS QUICK AND EASY
- REACH GREASE FITTINGS IN CROSS-AND-YOKE TYPE UNIVERSALS (Chrysler Products, Etc.) Price \$1.70

WEIGHT
1/2 lb. Per Doz.

PACKED
12 to Box or 12 on Display
(Display Code DCG1-12)

The Hunter grease injector fits all openings on standard grease fittings. Simply adjust the injector against the openings by using a twisting motion. Forces grease into battered fittings and through openings where fittings are missing. Does jobs that cannot be done by regulation equipment. The small opening in tip of injector, increases pressure to approximately eight times normal!

Quickly lubricates universal joints, water pumps, metal-covered springs, wheel bearings, etc. Reaches grease fittings in cross-and-yoke type universals—such as on Hudson, Studebaker, Ford and Jeep. To lubricate boot-type universals on Chrysler products, punch small hole in boot-cover. Where boot-type universals have metal plug (such as Dodge), remove plug. Not necessary to insert fitting before lubricating.

Code PH

Code PM

Attach quickly by merely pushing grease injector on to grease gun—to remove, "break to side" and pull off.
